
TBI-GEU Internship Project Brief

App Name:

RuralGrow AI

One-Line Pitch:

An AI-powered full-stack business growth assistant designed specifically for rural micro-enterprises to automate customer review sentiment analysis and marketing content generation.

Target User:

Small-scale rural entrepreneurs (such as agricultural farmers, traditional handloom weavers, and eco-homestay hosts) who lack technical skills or copywriting expertise to manage digital customer feedback and create promotional campaigns, requiring an intuitive digital assistant to grow.

Core Features (3-5):

- AI Review Sentiment Classifier: Automatically analyzes guest reviews, extracts custom themes (Food, Service, Cleanliness), and drafts warm, context-aware reply suggestions.
- AI Marketing Copy Generator: Instantly creates localized Facebook/Instagram captions with high-converting tags.
- AI WhatsApp Broadcast Assistant: Automates promotional message templates including active discount offers.
- Business Analytics Dashboard: Aggregates sentiments and theme frequencies in beautiful interactive charts.

AI Feature:

Automated sentiment classification, theme extraction, and ad-copy generation are powered by Google Gemini 1.5 Flash API due to its free-tier developer token accessibility, multilingual accuracy, and ultra-fast response speed.

Tech Stack:

Frontend (React.js), Styling (Vanilla CSS), Backend (Node.js/Express), Database (MongoDB), Auth method (JWT), Deployment (Vercel + Render).
