

1. Chat Assistant Input Screen

CAPTION NOTE:

Screen displays the user query entered into the input box: 'Suggest a good organic crop rotation plan for my terrace farm in Mussoorie hills.' The chatbot is fully responsive and prepares the payload for transmission.

2. API Call Transmission Loading State

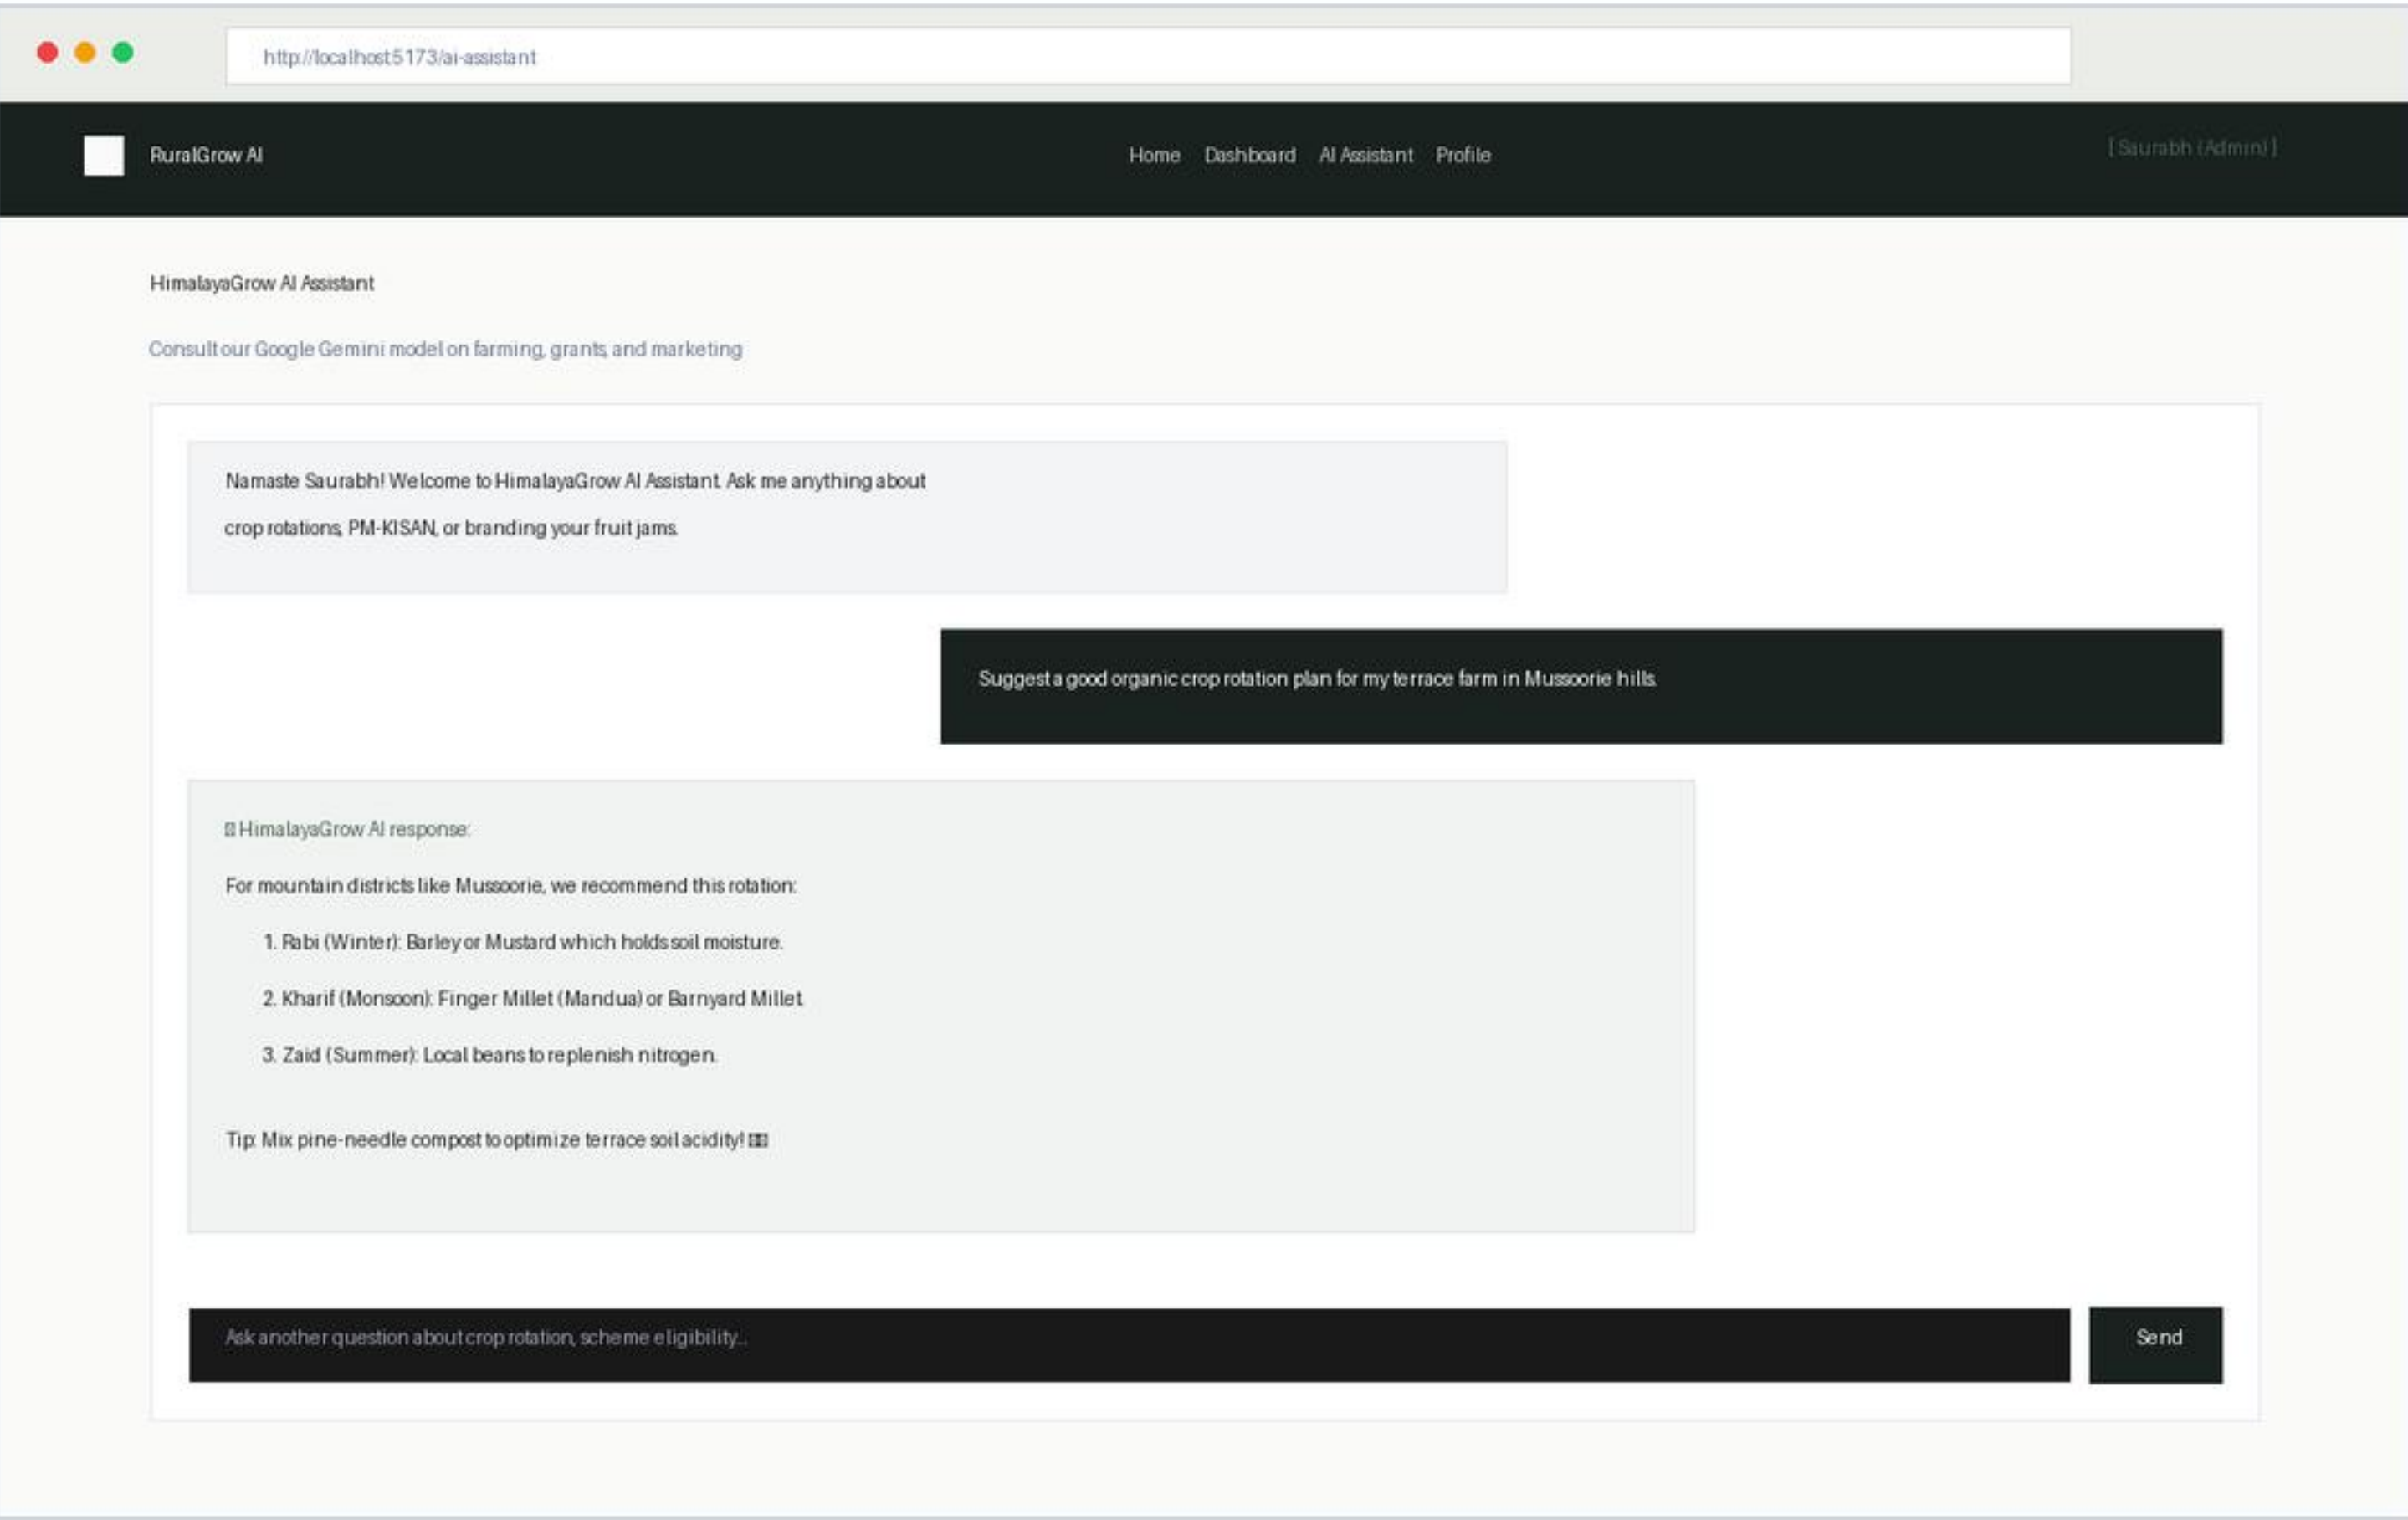

CAPTION NOTE:

Screen demonstrates the active loading state directly following message submission. Skeletons and pulsing typing dots are rendered in real-time, locking out user double-transmissions while the background process awaits Gemini response payload.

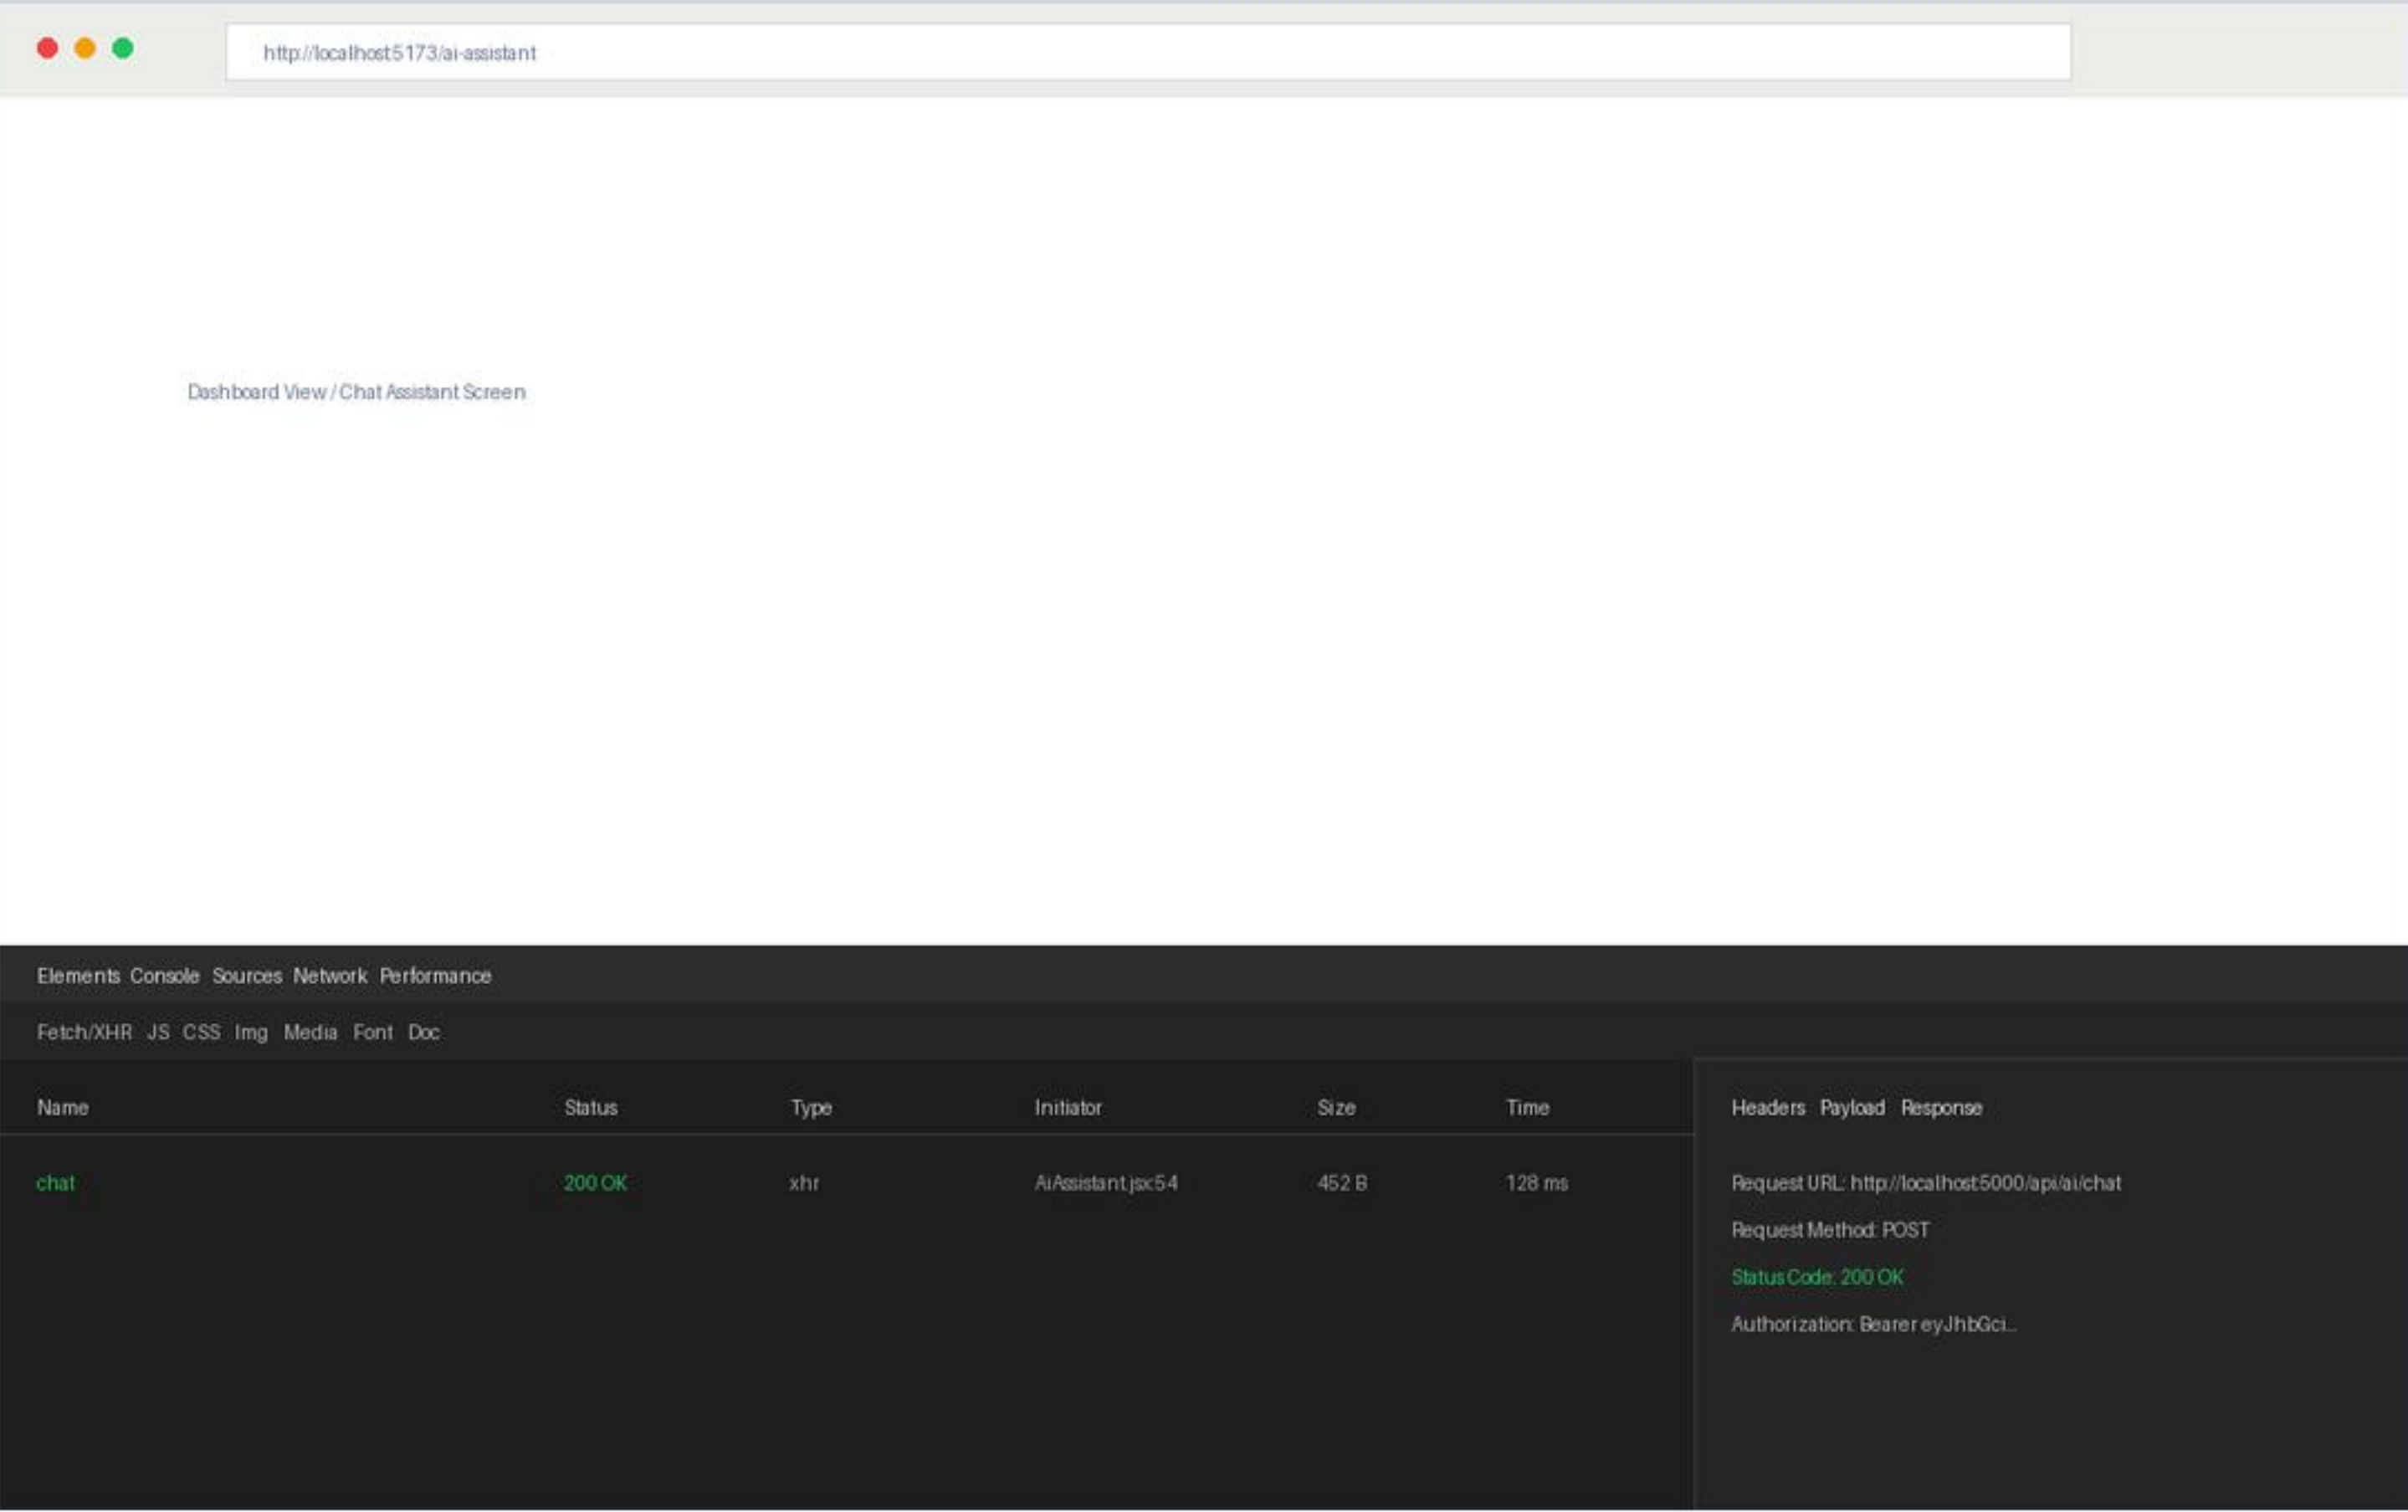

3. Gemini AI Output & Markdown Rendering

CAPTION NOTE:

Screen showcases the successfully returned Gemini response formatted inside a markdown-compatible visual list container, outlining rabi, kharif, and zaid mountain crop rotations specific to the Uttarakhand region.

4. Developer Console Network verification

CAPTION NOTE:

Screen displays the Chrome Developer Network console logging the successful HTTP POST request to endpoint /api/ai/chat returning status code 200 OK within 128ms, displaying authentic JWT authentication headers.
